

MONTHLY RETURN
OF THE
BIRTHS, DEATHS, AND MARRIAGES
REGISTERED
IN EIGHT OF THE PRINCIPAL TOWNS OF
SCOTLAND;
WITH THE CAUSES OF DEATH AT FOUR PERIODS OF LIFE.

JANUARY 1901.

Published by Authority of the Registrar-General.

EDINBURGH: Printed for His Majesty's Stationery Office by NEILL & Co. Ltd., Bellevue, and sold by JOHN MENZIES & Co., 39-47 Rose Street, Edinburgh, and 90 West Nile Street, Glasgow.

REPORT.

DURING the month of January 1901, there were registered in the Towns of Glasgow, Edinburgh, Dundee, Aberdeen, Leith, Paisley, Greenock, and Perth, the Births of 4176 children, of whom 2109 were males, and 2067 females. Of these, 3880 were legitimate, and 296 illegitimate, being in the proportion of one illegitimate in every 14·1 Births, or the illegitimate Births constituted 7·1 per cent. of the whole. In Greenock, 1·6 per cent. of the Births were illegitimate; in Leith, 5·6; in Glasgow, 6·1; in Paisley, 7·1; in Edinburgh, 7·8; in Dundee, 10·0; in Aberdeen, 10·6; and in Perth, 11·3 per cent.

1593 Marriages were registered in these Towns during January, being 163 below the average for the month during the last ten years, allowing for increase of the population.

The Deaths of 3074 persons were registered in these Towns during the month, of whom 1554 were males, and 1520 females. Increase of the population being allowed for, this number is 95 below the average for January during the last ten years.

A comparison of the Deaths registered shows that during January the mortality was at the annual rate of 17·6 Deaths per thousand persons in Leith; 18·2 in Paisley; 18·6 in Greenock; 21·4 in Aberdeen; 21·7 in Perth; 22·2 in Dundee; 22·5 in Edinburgh; and 23·5 in Glasgow.

Of the 1502 Deaths registered in Glasgow, 284 were of children under one year of age, and 300 of persons over 60 years; of the 591 in Edinburgh, 111 were of children under one year, and 154 of persons over 60 years; of the 319 in Dundee, 65 were under one, and 88 over 60; of the 268 in Aberdeen, 66 were under one, and 80 over 60; of the 119 in Leith, 27 were under one, and 29 over 60;

of the 123 in Paisley, 19 were under one, and 36 over 60; of the 95 in Greenock, 16 were under one, and 26 over 60; and of the 57 in Perth, 12 were under one, and 22 over 60 years.

Of the whole 3074 Deaths, 1073, or 34·9 per cent., were of children under five years of age. In Perth, 22·8 per cent. of the persons who died were under five years of age; in Dundee, 32·9; in Greenock, 33·7; in Edinburgh, 34·7; in Glasgow, 35·0; in Paisley, 35·8; in Aberdeen, 37·7; and in Leith, 40·3 per cent.

Miasmatic Diseases caused 421 Deaths, or 13·7 per cent. of the whole. No deaths from these diseases occurred in Perth, and the heaviest rate in any of the Towns occurred in Glasgow where it amounted to 16·4 per cent., and was principally caused by Hooping-Cough.

Fevers caused 36 Deaths, or 1·2 per cent. of the mortality. Of these 27 occurred in Glasgow, 4 in Edinburgh, and 5 in Aberdeen, and were all from Enteric Fever, with the exception of one in Glasgow, which was caused by Typhus.

Hooping-Cough was the most fatal epidemic, having caused 204 Deaths, or 6·6 per cent. of the whole mortality. Of these 150, or 10·0 per cent. occurred in Glasgow; 16, or 2·7 in Edinburgh; 23, or 7·2 in Dundee; 3, or 2·5 in Leith; 6, or 4·9 in Paisley; and 5, or 5·3 in Greenock.

From Measles 78 Deaths resulted, constituting 2·5 per cent. of the whole. In Edinburgh 40, or 6·8 per cent. of the Deaths were from Measles, in Aberdeen 25, or 9·3; and in Leith 4, or 3·4 per cent.

Small-pox caused 36 deaths, being at the rate of 1·2 per cent. of the whole (as compared with 9 Deaths during the previous month). Of these 35, or 2·3 per cent. occurred in Glasgow, and one occurred in Greenock.

Scarlatina caused 13 Deaths; Diphtheria, 30; and Puerperal Fever, 7.

Twenty-two Deaths resulted from Intemperance, of which 18 were attributed to Chronic Alcoholism, and 4 to Delirium Tremens.

Apoplexy caused 139 Deaths; Paralysis, 47; Heart Diseases, 268; and Premature Birth Debility, 91.

The Deaths from Inflammatory Affections of the Respiratory Organs (not including Consumption or Hooping-Cough) amounted to 581, or 18·9 per cent. Those from Consumption alone numbered 295, or 9·6 per cent. Three Deaths were attributed to Croup.

126 Deaths resulted from Violent Causes, of which 5 were Suicidal (2 by Cut-throat, one by Hanging, one by Poison, and one by Precipitation).

Three males and 9 females were aged 90 years and upwards, the eldest being a widow aged 93 years.

THE METEOROLOGICAL RETURNS

FOR

EIGHT OF THE PRINCIPAL TOWNS IN SCOTLAND,

Reduced and corrected as heretofore for instrumental errors, give for their mean position, *i.e.*, Lat. $56^{\circ}12'$ N., and Long. $3^{\circ}30'$ W., and height 152 feet above the sea-level.

For the month of JANUARY 1901.

Mean barometric pressure at sea level, 29·899 inches; greater than the average for the same month of 1856–1900 by 0·077 inch.

Barometric monthly range, 1·567 inch; less by 0·077 inch.

Mean temperature, $38^{\circ}1$; less by $0^{\circ}1$.

Mean daily range of temperature, $8^{\circ}5$; less by $0^{\circ}5$.

Mean humidity, 87; being the average.

Rain, number of days, 18; greater by 1 day.

Rain, depth in inches, 2·51; less by 1·13 inch.

Wind, pressure on square foot, 1·98 lb.; being the average.

Wind, direction of, E. to W. as 7 to 12, and N. to S. as 3 to 2; the average being E. to W. as 5 to 13, and N. to S. as 4 to 7.

Hence the weather of January 1901 was characterised by a mean barometric pressure a little above the average, with a monthly range a little under it; a mean temperature nearly the average, with a mean daily range half a degree under it; an average mean humidity; a mean rainfall fully an inch less than the average, falling 1 day more than the average; a large preponderance of south-easterly winds blowing with the average force of the month.

The mean temperature was $38^{\circ}1$, being nearly the average, the days and nights being also near the average in each case. The extremes were $0^{\circ}6$ above the average at Aberdeen, and $0^{\circ}9$ under the average at Perth, these results being in each case corroborated by the returns from Stations in the respective neighbourhoods. At Perth, calms, with clear nights, frequently occurred when the night temperature fell correspondingly. The absolutely highest temperature was $54^{\circ}2$ on the 10th at Aberdeen, and the lowest $20^{\circ}0$ on the 29th at Perth.

The mean rainfall was 2·51 inches, or 31 per cent. less than the average. At all stations the rainfall was less than the average, the greatest deficiency being 36 per cent. at Perth and Greenock, and the least 18 per cent. at Aberdeen, and 4 per cent. at Edinburgh. The largest amount collected was 5·01 inches at Greenock, and the least 1·72 inch at Dundee. The largest daily fall was 0·52 inch at Perth on the 30th. Nearly all the rain fell on the first two days and last fortnight of the month, and from the 25th to the 30th snow was of frequent occurrence.

ABSTRACT OF METEOROLOGICAL OBSERVATIONS

Made at GLASGOW, EDINBURGH, DUNDEE, ABERDEEN, LEITH, PAISLEY, GREENOCK, and PERTH,

During the Month of JANUARY 1901.

MONTHLY RETURN
OF THE
BIRTHS, DEATHS, AND MARRIAGES
REGISTERED
IN EIGHT OF THE PRINCIPAL TOWNS OF
SCOTLAND;
WITH THE CAUSES OF DEATH AT FOUR PERIODS OF LIFE.

FEBRUARY 1901.

Published by Authority of the Registrar-General.

EDINBURGH: Printed for His Majesty's Stationery Office by NEILL & Co. Ltd., Bellevue, and sold
by JOHN MENZIES & Co., 39-47 Rose Street, Edinburgh, and 90 West Nile Street, Glasgow.

REPORT.

DURING the month of February 1901, there were registered in the Towns of Glasgow, Edinburgh, Dundee, Aberdeen, Leith, Paisley, Greenock, and Perth, the Births of 3757 children, of whom 1935 were males, and 1822 females. Of these, 3494 were legitimate, and 263 illegitimate, being in the proportion of one illegitimate in every 14·3 Births, or the illegitimate Births constituted 7·0 per cent. of the whole. In Greenock, 4·8 per cent. of the Births were illegitimate; in Paisley, 5·5; in Glasgow, 6·5; in Leith, 6·6; in Edinburgh, 6·8; in Aberdeen, 8·5; in Dundee, 9·5; and in Perth, 11·7 per cent.

748 Marriages were registered in these Towns during February, being 12 above the average for the month during the last ten years, increase of the population being allowed for.

The Deaths of 2911 persons were registered in these Towns during the month, of whom 1410 were males, and 1501 females. Allowing for increase of the population, this number is 142 below the average for February during the last ten years.

A comparison of the Deaths registered shows that during February the mortality was at the annual rate of 18·2 Deaths per thousand persons in Leith; 20·1 in Aberdeen; 20·7 in Perth; 20·9 in Edinburgh; 22·2 in Dundee; 22·7 in Paisley; 23·3 in Greenock; and 25·8 in Glasgow.

Of the 1493 Deaths registered in Glasgow, 283 were of children under one year of age, and 334 of persons over 60 years; of the 496 in Edinburgh, 80 were of children under one year, and 134 of persons over 60 years; of the 288 in Dundee, 67 were under one year and 77 over 60; of the 227 in Aberdeen, 51 were under one, and 58 over 60; of the 111 in Leith, 20 were under one, and 37 over 60; of the 139 in Paisley, 27 were under one, and 47 over 60; of the 108 in Greenock,

20 were under one, and 39 over 60; and of the 49 in Perth, 7 were under one, and 15 over 60 years.

Of the whole 2911 Deaths, 1007, or 34·6 per cent., were of children under five years of age. In Perth, 22·4 per cent. of the persons who died were under five years of age; in Greenock, 25·0; in Leith, and in Paisley, 28·8; in Edinburgh, 31·0; in Glasgow, 36·3; in Dundee, 36·8; and in Aberdeen, 41·9 per cent.

Miasmatic Diseases caused 384 Deaths, or 13·2 per cent. of the whole. This rate was only exceeded in Glasgow, where it amounted to 15·3 per cent. of the deaths in that town, and was chiefly caused by Hooping-Cough and Smallpox.

Fevers caused 21 Deaths, of which 4 (2 in Glasgow, and 2 in Dundee) were from Typhus, and 17 from Enteric.

Hooping-Cough was the most fatal epidemic, having caused 170 Deaths, or 5·8 per cent. of the whole. Of these, 120 occurred in Glasgow, and 23 in Dundee, being at the rate of 8·0 per cent. of the deaths in each of these towns; 5 in Paisley, or 3·6 per cent. of the deaths there; and 16 in Edinburgh, or 3·2 per cent. of the deaths there.

Measles caused 72 Deaths or 2·5 per cent. of the whole mortality. Of these, 21, or 9·3 per cent., occurred in Aberdeen; 34, or 6·9 per cent., in Edinburgh; and 3, or 2·7 per cent., in Leith.

Small-pox caused 57 deaths, or 2·0 per cent. of the whole. Of these, 54 occurred in Glasgow, or 3·6 per cent. of the deaths in that town. Two occurred in Paisley and one in Aberdeen. During the previous month 36 Deaths were caused by Smallpox, of which 35 occurred in Glasgow, and one in Greenock.

Diphtheria caused 24 Deaths; Scarlatina, 20; and Puerperal Fever, 6.

Eight Deaths resulted from Intemperance, of which 6 were attributed to Chronic Alcoholism, and 2 to Delirium Tremens.

Apoplexy caused 119 Deaths; Paralysis, 53; Heart Diseases, 246; and Premature Birth Debility, 90.

The Deaths from Inflammatory Affections of the Respiratory Organs (not including Consumption or Hooping-Cough) amounted to 665, or 22·8 per cent. Those from Consumption alone numbered 244, or 8·4 per cent. Three Deaths resulted from Croup.

Violent Causes account for 95 Deaths, of which 5 were Suicidal (2 by Drowning, and one each by Cut-throat, Hanging, and Poisoning).

One male and 9 females were aged 90 years and upwards, the eldest, the widow of a mason, was aged 97 years.

* Return not received.

THE METEOROLOGICAL RETURNS

FOR

EIGHT OF THE PRINCIPAL TOWNS IN SCOTLAND,

Reduced and corrected as heretofore for instrumental errors, give for their mean position, *i.e.*, Lat. $56^{\circ}12'$ N., and Long. $3^{\circ}30'$ W., and height 152 feet above the sea-level.

For the month of FEBRUARY 1901.

Mean barometric pressure, 30.058 inches; greater than the average for the same month of 1856-1900 by 0.193 inch.

Barometric monthly range, 1.374 inch; less by 0.081 inch.

Mean temperature, $36^{\circ}8$; less by $2^{\circ}0$.

Mean daily range of temperature, $10^{\circ}2$; greater by $0^{\circ}5$.

Mean humidity, 85; less by 0.9.

Rain, number of days, 12; less by 3 days.

Rain, depth in inches, 1.60; less by 1.30 inch.

Wind, pressure on square foot, 1.22 lb.; less by 0.74 lb.

Wind, direction of, E. to W. as 4 to 12, and N. to S. as 9 to 3; the average being E. to W. as 6 to 11, and N. to S. as 4 to 6.

Hence the weather of February 1901 was characterised by a high mean barometric pressure, with a monthly range a little under it; a mean temperature two degrees under the average, with a mean daily range half a degree above it; a mean humidity a little less than the average; a mean rainfall little more than half the average, and falling on 3 days fewer than the average; an eight days excess of northerly and north-westerly winds blowing with a force less than has been recorded since 1891.

The mean barometric pressure was 30.058 inches, or 0.193 inch above the average. Mean pressure was much greater in the north and west than it was in the east and south, thus forming gradients for northerly and north-westerly winds which prevailed eight above their average.

The mean temperature was $36^{\circ}8$, or $2^{\circ}0$ less than the average, the days being $1^{\circ}7$ and the nights $2^{\circ}3$ under their averages. At Dundee and Perth the temperature was $2^{\circ}8$ under the average, whereas at Paisley it was only $1^{\circ}0$. The absolutely highest temperature was $51^{\circ}1$ on the 9th at Paisley, and the lowest $17^{\circ}0$ at Aberdeen and Perth, both on the 14th. The low maximum temperatures were a marked feature of the weather of the month, temperature at Dundee and Aberdeen not rising as high as $46^{\circ}0$ during the month.

The mean rainfall was 1.60 inch, or 45 per cent. less than the average. It was very unequally distributed over the Stations. The deficiency was 72 per cent. at Greenock, and 25 per cent. at Leith and Perth, whereas at Aberdeen there fell 2.47 inches or 12 per cent. in excess of the average. From the 5th to the 23rd the rainfall was very light at the Stations except at Aberdeen, where it was pretty well distributed over the whole month. From the 2nd to the 5th snow showers were of frequent occurrence at all the stations; and also from the 10th to the 13th at Aberdeen and Dundee.

MONTHLY RETURN

OF THE

BIRTHS, DEATHS, AND MARRIAGES

REGISTERED

IN EIGHT OF THE PRINCIPAL TOWNS OF SCOTLAND;

WITH THE CAUSES OF DEATH AT FOUR PERIODS OF LIFE.

MARCH 1901.

Published by Authority of the Registrar-General.

EDINBURGH: Printed for His Majesty's Stationery Office by NEILL & Co. Ltd., Bellevue, and sold
by OLIVER & BOYD, Edinburgh

REPORT.

DURING the month of March 1901, there were registered in the Towns of Glasgow, Edinburgh, Dundee, Aberdeen, Leith, Paisley, Greenock, and Perth, the Births of 4130 children, 2114 being of males, and 2016 of females. Of these, 3865 were legitimate, and 265 illegitimate, being in the proportion of one illegitimate in every 15·6 Births, or the illegitimate Births constituted 6·4 per cent. of the whole. In Leith, 3·1 per cent. of the Births were illegitimate; in Greenock, 4·2; in Paisley, 5·4; in Glasgow, 6·0; in Perth, 6·1; in Edinburgh, 6·8; and in Dundee and Aberdeen, 8·8 per cent.

740 Marriages were registered in these Towns during March, being 50 below the average for the month during the last ten years, after allowing for the increase of the population.

The Deaths of 2968 persons were registered in these Towns during March, of whom 1495 were males, and 1473 females. After allowance is made for the increase of the population, this number is found to be 253 below the average for the month during the last ten years.

A comparison of the Deaths registered shows that during March the mortality was at the annual rate of 14·5 Deaths per thousand persons in Perth; 16·1 in Leith; 17·9 in Aberdeen; 19·9 in Greenock; 20·0 in Dundee; 20·5 in Paisley; 22·1 in Edinburgh; and 23·2 in Glasgow.

Of the 1488 Deaths registered in Glasgow, 281 were of children under one year of age, and 296 of persons over 60 years; of the 581 in Edinburgh, 98 were of children under one year, and 172 of persons over 60 years; of the 287 in Dundee, 78 were of children under one, and 62 of persons over 60; of the 224 in Aberdeen, 55 were under one, and 80 over 60; of the 109 in Leith, 18 were under one,

and 25 over 60; of the 139 in Paisley, 26 were under one, and 46 over 60; of the 102 in Greenock, 26 were under one, and 25 over 60; and of the 38 in Perth, 3 were under one, and 13 over 60 years.

Of the whole 2968 Deaths, 1039, or 35·0 per cent., were of children under five years of age. In Perth, 15·8 per cent. of the persons who died were under five years of age; in Paisley, 33·1; in Edinburgh, 33·6; in Glasgow, 35·1; in Aberdeen, 35·3; in Leith, 37·6; in Dundee, 38·0; and in Greenock, 39·2 per cent.

Miasmatic Diseases caused 395 Deaths, or 13·3 per cent. of the whole. This rate was slightly exceeded in Glasgow from the prevalence of Small-pox and Hooping-Cough, in Edinburgh and Leith from Measles and Hooping-Cough, and in Paisley from Hooping-Cough alone.

Fevers caused 22 Deaths, of which 2 were due to Typhus (both in Glasgow), and 20 to Enteric Fever.

Hooping-Cough was the most fatal epidemic, having caused 177 Deaths, or 6·0 per cent. of the total mortality. Of these, 29 occurred in Edinburgh, or 5·0 per cent. of the Deaths in that town; 6 in Greenock, or 5·9 per cent.; 92 in Glasgow, or 6·2 per cent.; 7 in Leith, or 6·4 per cent.; 13 in Paisley, or 9·4 per cent.; and 28 in Dundee, or 9·8 per cent.

Measles caused 53 Deaths, or 1·8 per cent. of the total mortality. Of these, 29 occurred in Edinburgh and 6 in Leith, forming 5·0 and 5·5 per cent. of the Deaths in these towns respectively.

Small-pox caused 74 deaths, or 2·5 per cent. of the whole. One of these was registered in Paisley and the remaining 73 in Glasgow, being in the proportion of 4·9 per cent. of the total number of deaths in the latter town. During the previous month 57 Deaths were recorded from Small-pox, of which 54 occurred in Glasgow, 2 in Paisley, and 1 in Aberdeen.

Diphtheria caused 22 Deaths; Scarlet Fever, 16; and Puerperal Fever, 8.

Thirteen Deaths were due to Intemperance, of which 12 were attributed to Chronic Alcoholism, and 1 to Delirium Tremens.

Apoplexy caused 128 Deaths; Paralysis, 47; Diseases of the Heart, 242; and Premature Birth Debility, 80.

The Deaths from Inflammatory Affections of the Respiratory Organs (not including Consumption or Hooping-Cough) amounted to 613, or 20·7 per cent. Those from Consumption alone numbered 252, or 8·5 per cent. Six Deaths were caused by Croup.

The Deaths from Violent Causes numbered 96, of which 2 were Suicidal (1 by Cut-throat, and 1 by Coal Gas Poisoning).

Five males and 4 females were aged 90 years and upwards, the eldest being a widow who had completed 99 years.

THE METEOROLOGICAL RETURNS

FOR

EIGHT OF THE PRINCIPAL TOWNS IN SCOTLAND,

Reduced and corrected as heretofore for instrumental errors, give for their mean position, *i.e.*, Lat. $56^{\circ}12' N.$, and Long. $3^{\circ}30' W.$, and height 152 feet above the sea-level.

For the month of MARCH 1901.

Mean barometric pressure, 29.756 inches; less than the average for the same month of 1856-1900 by 0.070 inch.

Barometric monthly range, 1.804 inch; greater by 0.368 inch.

Mean temperature, $39^{\circ}6$; less by $0^{\circ}7$.

Mean daily range of temperature, $11^{\circ}3$; less by $0^{\circ}3$.

Mean humidity, 82; less by 1.5.

Rain, number of days, 16; greater by 1 day.

Rain, depth in inches, 2.05; less by 0.54 inch.

Wind, pressure on square foot, 2.79 lbs.; greater by 0.78 lb.

Wind, direction of, E. to W. as 8 to 9, and N. to S. as 8 to 6; the average being E. to W. as 7 to 12, and N. to S. as 6 to 4.

Hence the weather of March 1901 was characterised by a rather low barometric pressure, with an unusually large monthly range, greater indeed than any recorded since 1876; a mean temperature, and a mean daily range, both rather under the average; a mean humidity, less than the average; a mean rainfall considerably less than the average, falling one day more than the average; and a large excess of northerly and easterly winds, blowing with a force greater than in any March since 1883.

The mean barometric pressure was 29.756 inches, or 0.070 inch under the average. Mean pressure was decidedly under the average more in the west and south than in east and north, thus giving rise to a greater prevalence of north-easterly winds, and greater dryness and cold than is usual in March.

The mean temperature was $39^{\circ}6$, or $0^{\circ}7$ less than the average, the deficiency being equally distributed between the days and the nights. At Stations in the east, temperature was fully a degree under the average, but in the west the deficiency was only half a degree. The last week was the coldest period of the month, the mean of this week at Aberdeen being $31^{\circ}5$, or $8^{\circ}5$ under the average. The absolutely highest temperature was $64^{\circ}0$ on the 10th, and the lowest $12^{\circ}0$ on the 29th, both occurring at Aberdeen, thus giving the very large monthly range of $52^{\circ}0$ at this Station. At King's College, Aberdeen, the monthly range was $58^{\circ}0$.

The mean rainfall was 2.05 inches, or 21 per cent. under the average. At Leith and Paisley the amounts were the average; but at Glasgow they were 33 per cent., and at Dundee 24 per cent. under the average. The largest absolute amount was 3.74 inches at Greenock, and the least 1.42 inch at Dundee. The rain fell chiefly on the first week, from the 15th to the 20th, and on the last three days of the month. Showers of snow were of frequent occurrence after the 24th, particularly during the storm of the 29th.

ABSTRACT OF METEOROLOGICAL OBSERVATIONS

Made at GLASGOW, EDINBURGH, DUNDEE, ABERDEEN, LEITH, PAISLEY, GREENOCK, and PERTH,

During the Month of MARCH 1901.

MONTHLY RETURN
OF THE
BIRTHS, DEATHS, AND MARRIAGES
REGISTERED
IN EIGHT OF THE PRINCIPAL TOWNS OF
SCOTLAND;
WITH THE CAUSES OF DEATH AT FOUR PERIODS OF LIFE.

APRIL 1901.

Published by Authority of the Registrar-General.

EDINBURGH: Printed for His Majesty's Stationery Office by NEILL & Co. Ltd., Bellevue, and sold
by OLIVER & BOYD Edinburgh.

REPORT.

DURING the month of April 1901, there were registered in the Towns of Glasgow, Edinburgh, Dundee, Aberdeen, Leith, Paisley, Greenock, and Perth, the Births of 4386 children, of whom 2242 were males, and 2144 females. Of these, 4095 were legitimate, and 291 illegitimate, being in the proportion of one illegitimate in every 15·1 Births, or the illegitimate Births constituted 6·6 per cent. of the whole. In Perth, 2·7 per cent. of the Births were illegitimate; in Leith, 5·6; in Greenock, 5·8; in Glasgow, 5·9; in Paisley, 6·2; in Aberdeen, 7·4; in Edinburgh, 7·7; and in Dundee 9·7 per cent.

1246 Marriages were registered in these Towns during the month, being 109 above the average for April during the ten preceding years, after allowing for the increase of population.

The Deaths of 3216 persons were recorded in these eight Towns during April, of whom 1587 were males, and 1629 females. After allowance is made for the increase of population, this number is found to be 351 above the mean number for the same month during the last ten years.

The number of Deaths registered shows that during April the mortality was at the annual rate of 18·5 Deaths per thousand persons in Perth; 21·1 in Leith; 23·6 in Aberdeen; 24·0 in Paisley; 24·2 in Edinburgh and in Glasgow; 24·8 in Dundee; and 25·6 in Greenock.

Of the 1500 Deaths registered in Glasgow, 306 were of children under one year of age, and 296 of persons over 60 years; of the 616 in Edinburgh, 108 were of children under one year, and 152 of persons over 60 years; of the 345 in Dundee, 79 were of children under one, and 91 of persons over 60; of the 286 in Aberdeen, 63 were under one, and 88 over 60; of the 138 in Leith, 24 were under one,

and 31 over 60; of the 157 in Paisley, 34 were under one, and 42 over 60; of the 127 in Greenock, 19 were under one, and 37 over 60; and of the 47 in Perth, 7 were under one, and 21 over 60 years.

Of the whole 3216 Deaths, 1182 or 36·0 per cent., were of children under five years of age. In Perth, 17·0 per cent. of the persons who died were under five years of age; in Greenock, 27·6; in Aberdeen, 31·5; in Edinburgh, 34·1; in Paisley, 36·9; in Glasgow, 37·5; in Dundee, 40·0; and in Leith, 42·8 per cent.

Miasmatic Diseases caused 428 Deaths, being 13·3 per cent. of the total mortality. This proportion was exceeded in Edinburgh, Leith and Paisley from the prevalence of Measles and Hooping-Cough, and in Glasgow from Hooping-Cough alone.

Fevers caused 16 Deaths, of which 1 (in Glasgow), was due to Typhus, 14 to Enteric, and 1 to Simple Continued Fever.

Hooping-Cough was the most fatal epidemic, having caused 235 Deaths, or 7·3 per cent. of the whole. In Leith, 5 Deaths were due to Hooping-Cough, being 3·6 per cent. of the total in that town; in Paisley, the number was 11, or 7·0 per cent.; in Dundee, 25, or 7·2 per cent.; in Glasgow, 132, or 8·8 per cent.; and in Edinburgh, 59, or 9·6 per cent.

From Measles there resulted 90 Deaths, or 2·8 per cent. of the total mortality. Of these 7 occurred in Paisley, or 4·5 per cent. of the total in that town; 33 in Edinburgh, or 5·4 per cent.; and 21 in Leith, or 15·2 per cent.

From Small-pox 26 deaths were registered, all of which occurred in Glasgow. During the previous month 74 deaths were recorded from Small-pox, one of which took place in Paisley, and the remaining 73 in Glasgow.

Diphtheria and Scarlet Fever each caused 18 Deaths; and Puerperal Fever, 9.

Nine Deaths were the result of Intemperance, 8 being ascribed to Chronic Alcoholism, and 1 to Delirium Tremens.

Apoplexy caused 130 Deaths; Paralysis, 62; Diseases of the Heart, 278; and Premature Birth Debility, 87.

The Deaths from Inflammatory Affections of the Respiratory Organs (not including Consumption or Hooping-Cough) amounted to 649, or 20·2 per cent. Those from Consumption alone numbered 278, or 8·6 per cent. Two Deaths were caused by Croup.

From Violent Causes there resulted 116 Deaths, of which 8 were Suicidal (5 by Cut-throat, and 1 each by Drowning, Hanging, and Shooting).

Five males and 7 females were aged 90 and upwards, the eldest of whom was the daughter of a Farmer, who was aged 96 years.

* Chicken-pox.

THE METEOROLOGICAL RETURNS

FOR

EIGHT OF THE PRINCIPAL TOWNS IN SCOTLAND,

Reduced and corrected as heretofore for instrumental errors, give for their mean position, *i.e.*, Lat. $56^{\circ}12' N.$, and Long. $3^{\circ}30' W.$, and height 152 feet above the sea-level.

For the month of APRIL 1901.

Mean barometric pressure, 29.750 inches; less than the average for the same month of 1856-1900 by 0.150 inch.

Barometric monthly range, 1.253 inch; greater by 0.041 inch.

Mean temperature, $45^{\circ}6$; greater by $0^{\circ}5$.

Mean daily range of temperature, $15^{\circ}5$; greater by $1^{\circ}6$.

Mean humidity, 78; less by 1.9.

Rain, number of days, 17; greater by 4 days.

Rain, depth in inches, 2.50; greater by 0.33 inch.

Wind, pressure on square foot, 1.95 lb.; greater by 0.15 lb.

Wind, direction of, E. to W. as 7 to 11, and N. to S. as 4 to 9; the average being E. to W. as 9 to 9, and N. to S. as 5 to 6.

Hence the weather of April 1901 was characterised by a low barometric pressure, with a monthly range, slightly above the average; a mean temperature half a degree above the average, with a mean daily range considerably above the average; a mean humidity, a little under the average; a mean rainfall rather above the average; falling on four days more than the average; and a large excess of south westerly winds.

The mean barometric pressure was 29.750 inches, or 0.015 inch under the average.

Pressure was more under the average at places in the west than in the east, giving rise to a greater prevalence of south-westerly winds than is usual in April.

The mean temperature was $45^{\circ}6$, or half a degree above the average, the days being $1^{\circ}3$ above, and the nights $0^{\circ}2$ under the average, the higher temperature being thus wholly occasioned by the greater heat of the days as contrasted with the nights. At Edinburgh, Leith, Paisley and Greenock, temperature was fully a degree above the average, but at Aberdeen it was half a degree under it. The absolutely highest temperature was $74^{\circ}0$ on the 21st at Paisley, and the lowest $27^{\circ}0$ on the 6th at Aberdeen.

The mean rainfall was 2.50 inches, or 15 per cent. above the average. It was very unequally distributed among the stations. Thus while at Edinburgh and Leith it was 25 per cent. under the average, it was above the average at all the other towns, being above the average 52 per cent. at Paisley, 46 per cent. at Greenock, 10 per cent. at Aberdeen, and at Dundee just above the average. Nearly all the rain fell from the 1st to the 18th, and from the 27th to the 29th. On the 2nd the fall was 2.35 inches at Greenock, 1.39 inch at Paisley, and 1.15 inch at Dundee. Snow and hail fell on the 1st, 3rd, 4th, 9th, and from the 13th to the 16th; and thunder occurred on the 9th and 10th.

ABSTRACT OF METEOROLOGICAL OBSERVATIONS

Made at GLASGOW, EDINBURGH, DUNDEE, ABERDEEN, LEITH, PAISLEY, GREENOCK, and PERTH,

MONTHLY RETURN
OF THE
BIRTHS, DEATHS, AND MARRIAGES
REGISTERED
IN EIGHT OF THE PRINCIPAL TOWNS OF
SCOTLAND;

WITH THE CAUSES OF DEATH AT FOUR PERIODS OF LIFE.

MAY 1901.

Published by Authority of the Registrar-General.

EDINBURGH: Printed for His Majesty's Stationery Office by NEILL & Co. Ltd., Bellevue, and sold by OLIVER & BOYD, Edinburgh.

REPORT.

NOTE.—The estimates of population now used are founded upon the numbers returned in the Summaries prepared by the Registrars after the recent Census. These numbers may be accepted as correct enough for all practical purposes, and will be employed until the revised details of the Census are obtained.

During the month of May 1901, there were registered in the Towns of Glasgow, Edinburgh, Dundee, Aberdeen, Paisley, Leith, Greenock, and Perth, the Births of 4436 children, of whom 2260 were males, and 2176 females. Of these, 4163 were legitimate, and 273 illegitimate. Thus the illegitimate Births constituted 6·2 per cent. of the whole, being in the proportion of one illegitimate in every 16·2 Births. In Paisley, 4·9 per cent. of the Births were illegitimate; in Glasgow, 5·3; in Greenock, 5·5; in Leith, 5·8; in Edinburgh, 6·1; in Aberdeen, 7·6; in Dundee, 9·7; and in Perth, 10·8 per cent.

497 Marriages were registered in these Towns during the month, being 78 below the average for May during the ten preceding years, increase of the population being allowed for.

The Deaths of 2842 persons were registered in these eight Towns during May, of whom 1471 were males, and 1371 females. After allowance is made for the increase of population, this number is found to be 22 above the average number for the same month during the last ten years.

The number of Deaths registered shows that during May the mortality was at the annual rate of 16·8 Deaths per thousand persons in Perth and in Leith; 18·3 in Aberdeen; 19·7 in Greenock; 20·2 in Glasgow; 21·3 in Paisley; 21·4 in Edinburgh; and 21·7 in Dundee.

Of the 1311 Deaths registered in Glasgow, 279 were of children under one year of age, and 219 of persons over 60 years; of the 577 in Edinburgh, 101 were of children under one year, and 139 of persons over 60 years; of the 298 in Dundee, 58 were of children under one, and 89 of persons over 60; of the 240 in Aberdeen, 57 were under one, and 73 over 60; of the 144 in Paisley, 24 were under one, and 41 over 60; of the 111 in Leith, 28 were under one, and 18 over 60; of the 114 in Greenock, 20 were under one, and 21 over 60; and of the 47 in Perth, 9 were under one, and 20 over 60 years.

Of the whole 2842 Deaths, 1053, or 37·1 per cent., were of children under five years of age. In Perth, 29·8 per cent. of the persons who died were under five years of age; in Paisley, 31·3; in Dundee, 33·9; in Aberdeen, 34·2; in Edinburgh, 34·7; in Glasgow, 39·4; in Greenock, 40·3; and in Leith, 44·1 per cent.

Miasmatic Diseases caused 344 Deaths, being 12·1 per cent. of the total mortality. This proportion was exceeded in Edinburgh, from the prevalence of Hooping-Cough, and in Leith from Hooping-Cough and Measles.

Fevers caused 9 Deaths, of which 1 (in Glasgow) was due to Typhus, and 8 to Enteric Fever.

Hooping-Cough was the most fatal epidemic, having caused 200 Deaths, or 7·0 per cent. of the whole. In Paisley, 6 Deaths were due to Hooping-Cough, being 4·2 per cent. of the total in that town; in Glasgow, the number was 92, or 7·0 per cent.; in Dundee, 21, or 7·0 per cent.; in Leith, 12, or 10·8 per cent.; and in Edinburgh, 66, or 11·4 per cent.

From Measles there resulted 75 Deaths, or 2·6 per cent. of the total mortality. Of these, 8 occurred in Leith, or 7·2 per cent. of the total in that town.

From Small-pox 6 deaths were registered, all of which occurred in Glasgow. During the previous month 26 deaths were recorded from Small-pox, all occurring in Glasgow.

Diphtheria caused 17 Deaths; Scarlet Fever 18; and Puerperal Fever 8.

Ten Deaths were the result of Intemperance, 7 being ascribed to Chronic Alcoholism, and 3 to Delirium Tremens.

Apoplexy caused 110 Deaths; Paralysis, 42; Diseases of the Heart, 247; and Premature Birth Debility, 93.

The Deaths from Inflammatory Affections of the Respiratory Organs (not including Consumption or Hooping-Cough) amounted to 467, or 16·4 per cent. Those from Consumption alone numbered 292, or 10·3 per cent. Four Deaths were caused by Croup.

From Violent Causes there resulted 106 Deaths, of which 7 were Suicidal (5 by Cut-throat, and 1 each by Drowning and Shooting).

Four males and 4 females were aged 90 and upwards, the eldest of whom was a house-proprietrix aged 97 years.

THE METEOROLOGICAL RETURNS

FOR

EIGHT OF THE PRINCIPAL TOWNS IN SCOTLAND,

Reduced and corrected as heretofore for instrumental errors, give for their mean position, *i.e.*, Lat. $56^{\circ}12'$ N., and Long. $3^{\circ}30'$ W., and height 152 feet above the sea-level.

For the month of MAY 1901.

Mean barometric pressure, 30.133 inches; greater than the average for the same month of 1856–1900 by 0.186 inch.

Barometric monthly range, 1.353 inch; greater by 0.255 inch.

Mean temperature, $52^{\circ}2$; greater by $2^{\circ}4$.

Mean daily range of temperature, $18^{\circ}4$; greater by $3^{\circ}5$.

Mean humidity, 76; less by 1.0.

Rain, number of days, 11; less by 3 days.

Rain, depth in inches, 1.99; less by 0.25 inch.

Wind, pressure on square foot, 1.04 lb.; less by 0.51 lb.

Wind, direction of, E. to W. as 12 to 7, and N. to S. as 5 to 7; the average being E. to W. as 10 to 9, and N. to S. as 6 to 6.

Hence the weather of May 1901 was characterised by an unusually high mean barometric pressure, with a monthly range also largely above the average; a mean temperature $2^{\circ}4$ above the average, with a mean daily range only thrice exceeded during the past forty years; a low humidity; a mean rainfall less than the average, falling on three days fewer than the average; a very large excess of easterly winds of a force greatly under the average.

The mean barometric pressure was 30.133 inches, or 0.186 above the average. This pressure has, since 1856, been only exceeded in 1876 and 1896, when it was respectively 30.148 inches and 30.265 inches. The excess was rather higher at northern Stations than in the south, thus forming lower gradients and a diminished wind force.

The mean temperature was $52^{\circ}2$, or $2^{\circ}4$ above the average, the days being $4^{\circ}1$ and the nights $0^{\circ}7$ above the average. This great difference of temperature between the days and the nights was occasioned by the strongly marked anticyclones, with the accompanying clear dry atmosphere and strong sunshine which prevailed. The least excess with these easterly winds was $1^{\circ}1$ at Aberdeen, and the greatest $3^{\circ}6$ at Greenock, Paisley, and Glasgow, thus shewing, in a striking manner, the increasing temperature of these winds as they advanced westwards. The absolutely highest temperature was $76^{\circ}0$ on the 14th at Paisley and the lowest $32^{\circ}9$ on the 12th at Glasgow.

The mean rainfall was 1.99 inches, or 11 per cent. less than the average. At Leith the rainfall was 17 per cent. above the average; at Aberdeen and Edinburgh the average; but at Greenock it was 42 per cent. under the average. No rain fell from the 1st to the 4th, and from the 12th to the 25th. The heaviest rain fell on the 30th. Thunder occurred at Leith on the 5th and at Aberdeen on the 28th.

ABSTRACT OF METEOROLOGICAL OBSERVATIONS

Made at GLASGOW, EDINBURGH, DUNDEE, ABERDEEN, LEITH, PAISLEY, GREENOCK, and PERTH,

MONTHLY RETURN
OF THE
BIRTHS, DEATHS, AND MARRIAGES
REGISTERED
IN EIGHT OF THE PRINCIPAL TOWNS OF
SCOTLAND;
WITH THE CAUSES OF DEATH AT FOUR PERIODS OF LIFE.

JUNE 1901.

Published by Authority of the Registrar-General.

EDINBURGH: Printed for His Majesty's Stationery Office by NEILL & Co. Ltd., Bellevue, and sold
by OLIVER & BOYD, Edinburgh.

REPORT.

NOTE.—The estimates of population now used are founded upon the numbers returned in the Summaries prepared by the Registrars after the recent Census. These numbers may be accepted as accurate enough for all practical purposes, and will be employed until the revised details of the Census are available.

During the month of June 1901, there were registered in the Towns of Glasgow, Edinburgh, Dundee, Aberdeen, Paisley, Leith, Greenock, and Perth, the Births of 4183 children, of whom 2085 were males, and 2098 females. Of these, 3895 were legitimate, and 288 illegitimate. The illegitimate Births thus constituted 6·9 per cent. of the whole, or one birth in every 14·5 was illegitimate. In Paisley, 2·6 per cent. of the Births were illegitimate; in Perth, 3·4; in Leith, 5·0; in Greenock, 6·0; in Glasgow, 6·5; in Edinburgh, 7·6; in Aberdeen, 8·1; and in Dundee, 10·3 per cent.

2015 Marriages were registered in these Towns during the month, being 96 below the average for June during the ten preceding years, increase of population being allowed for.

The Deaths of 2366 persons were registered in these eight Towns during June, of whom 1222 were males, and 1144 females. After allowance is made for the increase of population, this number is found to be 239 below the average for the same month during the ten previous years.

A comparison of the Deaths registered shows that during June the mortality was at the annual rate of 14·6 Deaths per thousand persons in Aberdeen; 14·7 in Leith; 15·5 in Perth; 16·0 in Paisley; 17·1 in Greenock; 17·2 in Edinburgh; 17·3 in Dundee; and 18·5 in Glasgow.

Of the 1164 Deaths registered in Glasgow, 244 were of children under one year of age, and 207 of persons over 60 years; of the 450 in Edinburgh, 75 were of children under one year, and 111 of persons over 60 years; of the 230 in Dundee, 43 were of children under one year, and 73 of persons over 60; of the 185 in Aberdeen, 26 were of children under one, and 58 of persons over 60; of the 105 in Paisley, 13 were under one, and 22 over 60; of the 94 in Leith, 18 were under one, and 26 over 60; of the 96 in Greenock, 14 were under one, and 27 over 60; and of the 42 in Perth, 6 were under one year, and 13 over 60 years.

Of the whole 2366 Deaths, 853, or 36·1 per cent., were of children under five years of age. In Perth, 14·3 per cent. of the persons who died were under five years of age; in Aberdeen, 22·7; in Paisley, 29·5; in Edinburgh, 30·7; in Dundee, 33·9; in Greenock, 34·4; in Glasgow, 41·6; and in Leith, 43·6 per cent.

Miasmatic Diseases caused 307 Deaths, or 13·0 per cent. of the whole. This rate was exceeded in Glasgow and Leith from the prevalence of Measles and Hooping-Cough, and in Greenock, where the greatest number of the Deaths from Miasmatic Diseases were due to Measles.

Fevers caused 12 Deaths, of which 2 (in Glasgow) were due to Typhus, and the remainder to Enteric Fever.

From Hooping-Cough there resulted 160 Deaths, or 6·8 per cent. of the total mortality. From this cause there were registered in Glasgow, 79 Deaths, or 6·8 per cent. of the whole; in Dundee, 17, or 7·4 per cent.; in Edinburgh, 42, or 9·3 per cent.; and in Leith, 10, or 10·6 per cent.

To Measles 95 Deaths were attributed, being 4·0 per cent. of the total. The percentage of Deaths from Measles was 5·1 in Glasgow, 6·2 in Greenock, and 7·4 in Leith.

From Small-pox 4 Deaths were registered in Glasgow. This shows a decrease of 2 compared with the number recorded during the preceding month.

Diphtheria caused 17 Deaths; Scarlet Fever 13; Simple Cholera 1; and Puerperal Fever 9.

Ten Deaths were due to Intemperance, 7 being ascribed to Chronic Alcoholism, and 3 to Delirium Tremens.

From Apoplexy there resulted 79 Deaths; from Paralysis, 42; from Diseases of the Heart, 225; and from Premature Birth Debility, 71.

The Deaths from Inflammatory Affections of the Respiratory Organs (not including Consumption or Hooping-Cough) amounted to 386, being 16·3 per cent. of the whole. Those from Consumption alone numbered 216, or 9·1 per cent. From Croup one Death was recorded.

The Deaths of 114 persons resulted from Violent Causes, of which 4 were Suicidal (one each by Drowning, Hanging, Cut-throat, and Precipitation in front of a Railway train).

One male and 4 females were aged 90 years and upwards, the eldest being two widows, one of whom was aged 101 and the other 100 years.

THE METEOROLOGICAL RETURNS

FOR

EIGHT OF THE PRINCIPAL TOWNS IN SCOTLAND,

Reduced and corrected as heretofore for instrumental errors, give for their mean position, *i.e.*, Lat. $56^{\circ}12' N.$, and Long. $3^{\circ}30' W.$, and height 152 feet above the sea-level.

For the month of JUNE 1901.

Mean barometric pressure, 29.970 inches; greater than the average for the same month of 1856-1900 by 0.026 inch.

Barometric monthly range, 1.098 inch; greater by 0.168 inch.

Mean temperature, $55^{\circ}4$; less by $0^{\circ}4$.

Mean daily range of temperature, $16^{\circ}5$; greater by $1^{\circ}2$.

Mean humidity, 73; less by 4.6.

Rain, number of days, 12; less by 1 day.

Rain, depth in inches, 2.58; greater by 0.02 inch.

Wind, pressure on square foot, 1.90 lb.; greater by 0.57 lb.

Wind, direction of. E. to W. as 4 to 14, and N. to S. as 5 to 8; the average being E. to W. as 8 to 10, and N. to S. as 4 to 6.

Hence the weather of June 1901 was characterised by a mean barometric pressure slightly above the average, with a monthly range considerably above the average; a mean temperature a little under the average, with a mean daily range considerably above it; a mean humidity greatly less than the average; a mean rainfall about the average, falling one day fewer than the average; and a considerable excess of southerly and westerly winds, blowing with a force much above the average.

The mean barometric pressure was 29.970 inches, or 0.026 inch greater than the average. As pressure was relatively higher at the western towns than in the north-east, gradients were formed for the prevailing westerly winds. The mean temperature was $55^{\circ}4$, or $0^{\circ}4$ less than the average, the days being $0^{\circ}2$ above, but the nights $1^{\circ}0$ under it. At the towns in the west, mean temperatures were nearly the average, but at Aberdeen, Dundee, and Perth they were nearly a degree under it. The absolutely highest temperature was $80^{\circ}0$ on the 8th at Glasgow and Perth; and the lowest $37^{\circ}3$ on the 15th at Dundee. From the 12th to the 19th the weather was generally cold and wet, but from the 25th to the 30th it was warm and bright.

The mean rainfall was 2.58 inches, being very nearly the average. The amounts were very unequally distributed, being 33 per cent. at Aberdeen, and 8 per cent. at Perth under the average; the average at Leith; and 42 per cent. at Glasgow and 36 per cent. at Paisley above it. The absolutely smallest rainfall for the month was 1.28 inch at Aberdeen, and the largest 4.16 inches at Greenock. Little or no rain fell from the 5th to the 9th, 14th to the 16th, and from the 25th to the end of the month. The heaviest daily falls were recorded on the 22nd and 23rd, when an inch was exceeded at the towns in the west.

ABSTRACT OF METEOROLOGICAL OBSERVATIONS

Made at GLASGOW, EDINBURGH, DUNDEE, ABERDEEN, LEITH, PAISLEY, GREENOCK, and PERTH,

During the Month of JUNE 1901.

MONTHLY RETURN
OF THE
BIRTHS, DEATHS, AND MARRIAGES
REGISTERED
IN EIGHT OF THE PRINCIPAL TOWNS OF
SCOTLAND;
WITH THE CAUSES OF DEATH AT FOUR PERIODS OF LIFE.

JULY 1901.

Published by Authority of the Registrar-General.

EDINBURGH: Printed for His Majesty's Stationery Office by NEILL & Co. Ltd., Bellevue, and sold
by OLIVER & BOYD, Edinburgh.

REPORT.

NOTE.—The estimates of population now used are founded upon the numbers returned in the Summaries prepared by the Registrars after the recent Census. These numbers may be accepted as accurate enough for all practical purposes, and will be employed until the revised details of the Census are available.

During the month of July 1901, there were registered in the Towns of Glasgow, Edinburgh, Dundee, Aberdeen, Paisley, Leith, Greenock, and Perth, the Births of 4544 children, of whom 2399 were males, and 2145 females. Of these, 4257 were legitimate, and 287 illegitimate. The illegitimate Births thus constituted 6·3 per cent. of the whole, or one birth in every 15·8 was illegitimate. In Paisley, 2·3 per cent. of the Births were illegitimate; in Leith, 3·7; in Greenock, 4·5; in Glasgow 6·2; in Perth, 6·7; in Edinburgh, 7·0; in Dundee, 7·7; and in Aberdeen, 8·6 per cent.

2004 Marriages were registered in these Towns during the month, being 165 above the average for July during the ten preceding years, increase of population being allowed for.

The Deaths of 2682 persons were registered in these eight Towns during July, of whom 1415 were males, and 1267 females. After allowance is made for the increase of population, this number is found to be 189 above the average for the same month during the ten preceding years.

A comparison of the Deaths registered shows that during July the mortality was at the annual rate of 15·4 Deaths per thousand persons in Aberdeen; 17·6 in Paisley; 18·1 in Edinburgh; 18·2 in Perth; 19·4 in Leith; 19·8 in Glasgow; 20·5 in Dundee; and 21·4 in Greenock.

Of the 1288 Deaths registered in Glasgow, 348 were of children under one year of age, and 200 of persons over 60 years; of the 489 in Edinburgh, 94 were of children under one year, and 132 of persons over 60 years; of the 281 in Dundee, 71 were of children under one year, and 60 of persons over 60; of the 202 in Aberdeen, 50 were of children under one, and 57 of persons over 60; of the 119 in Paisley, 24 were under one, and 27 over 60; of the 128 in Leith, 45 were under one, and 30 over 60; of the 124 in Greenock, 36 were under one, and 22 over 60; and of the 51 in Perth, 8 were under one, and 21 over 60 years.

Of the whole 2682 Deaths, 1110, or 41·4 per cent., were of children under five years of age. In Perth, 17·6 per cent. of the persons who died were under five years of age; in Aberdeen, 32·2; in Edinburgh, 33·9; in Paisley, 34·5; in Greenock, 41·9; in Leith, 43·0; in Dundee, 43·4; and in Glasgow, 46·6.

Miasmatic Diseases caused 254 Deaths, or 9·4 per cent. of the whole. This rate was exceeded in Glasgow and Dundee from the prevalence of Measles, Hooping-Cough, and Diarrhoea.

Fevers caused 16 Deaths, of which 15 were due to Enteric, and 1 to Simple Continued Fever.

From Hooping-Cough there resulted 99 Deaths, or 3·7 per cent. of the total mortality. In Glasgow, 4·2 per cent. of the Deaths were due to Hooping-Cough; and in Edinburgh, 5·5.

To Measles 94 Deaths were attributed, being 3·5 per cent. of the total. The percentage of Deaths from Measles in Glasgow was 4·8, and in Dundee 7·5.

From Small-pox 2 Deaths were registered in Glasgow. This shows a decrease of 2 compared with the number recorded during the preceding month.

Diarrhoea and Dysentery caused 165 Deaths, or 6·2 per cent. of the whole. To these Diseases were attributed 6·5 per cent. of the Deaths in Glasgow; 7·6 of those in Paisley; 8·1 of those in Greenock; 8·2 of those in Dundee; 9·4 of those in Leith; and 9·8 of those in Perth.

Diphtheria caused 8 Deaths; Scarlet Fever 28; Simple Cholera 14; and Puerperal Fever 7.

Fourteen Deaths were due to Intemperance, 11 being ascribed to Chronic Alcoholism, and 3 to Delirium Tremens.

From Apoplexy there resulted 80 Deaths; from Paralysis, 45; from Diseases of the Heart, 216; and from Premature Birth Debility, 92.

The Deaths from Inflammatory Affections of the Respiratory Organs (not including Consumption or Hooping-Cough) amounted to 340, being 12·7 per cent. of the whole. Those from Consumption alone numbered 229, or 8·5 per cent. One Death was caused by Croup.

The Deaths of 115 persons resulted from Violent Causes, of which 9 were Suicidal (four each by Hanging and Cut-throat, and one in a manner not specified).

Two males and 3 females were aged 90 years and upwards, the oldest of whom was the widow of a coal-miner who was aged 98 years.

† Chicken-pox.

THE METEOROLOGICAL RETURNS

FOR

EIGHT OF THE PRINCIPAL TOWNS IN SCOTLAND,

Reduced and corrected as heretofore for instrumental errors, give for their mean position, *i.e.*, Lat. $56^{\circ}12'$ N., and Long. $3^{\circ}30'$ W., and height 152 feet above the sea-level.

For the month of JULY 1901.

Mean barometric pressure, 30.026 inches; greater than the average for the same month of 1856-1900 by 0.139 inch.

Barometric monthly range, 0.627 inch; less by 0.287 inch.

Mean temperature, $62^{\circ}5$; greater by $4^{\circ}2$.

Mean daily range of temperature, $15^{\circ}9$; greater by $1^{\circ}4$.

Mean humidity, 79; being the average.

Rain, number of days, 11; less by 4 days.

Rain, depth in inches, 1.53; less by 1.57 inch.

Wind, pressure on square foot, 1.20 lb.; less by 0.17 lb.

Wind, direction of, E. to W. as 7 to 12, and N. to S. as 5 to 7; the average being E. to W. as 6 to 7, and N. to S. as 4 to 6.

Hence the weather of July 1901 was characterised by a mean barometric pressure greatly above the mean, with an exceedingly low monthly range, the only other lower monthly range since 1856 was 0.512 inch in 1872; a mean temperature higher than any previously recorded for July, accompanied with a mean daily range considerably above the average; an average mean humidity; a mean rainfall, very greatly under the average, falling four days fewer than the average; a four days' excess of SE and NE winds, and a deficiency of four days from W., S., and E. winds.

The mean barometric pressure was 30.026 inches, being 0.139 inch above the average. The excess was nearly the same at all the towns.

The mean temperature was $62^{\circ}5$, or $4^{\circ}2$ above the average, the days being $5^{\circ}1$ and the nights $3^{\circ}3$ in excess. This has been the warmest July for the past forty-six years, the next warmest being $61^{\circ}0$ in 1868. The excess was about one degree greater in western than in eastern districts. The absolutely highest temperature was $82^{\circ}9$ on the 18th at Leith; and the lowest $41^{\circ}7$ on the 29th at Glasgow.

The mean rainfall was 1.53 inch, or 50 per cent. under the average. The least amount collected was 0.94 inch at Dundee, and the largest 2.35 inches at Greenock; these being respectively 70 and 40 per cent. under their averages. Nearly the whole rain fell from the 19th to the 27th. On the 20th, 1.35 inch fell at Greenock and 1.18 at Paisley. The type of weather was eminently anticyclonic, with strong sunshine. Thunderstorms were frequent from the 14th to the 21st, with heavy showers of rain.

ABSTRACT OF METEOROLOGICAL OBSERVATIONS

Made at GLASGOW, EDINBURGH, DUNDEE, ABERDEEN, LEITH, PAISLEY, GREENOCK, and PERTH,

During the Month of JULY 1901.

MONTHLY RETURN
OF THE
BIRTHS, DEATHS, AND MARRIAGES
REGISTERED
IN EIGHT OF THE PRINCIPAL TOWNS OF
SCOTLAND;
WITH THE CAUSES OF DEATH AT FOUR PERIODS OF LIFE.

AUGUST 1901.

Published by Authority of the Registrar-General.

EDINBURGH: Printed for His Majesty's Stationery Office by NEILL & Co. Ltd., Bellevue, and sold by OLIVER & BOYD, Edinburgh.

REPORT.

NOTE.—The estimates of population now used are founded upon the numbers returned in the Summaries prepared by the Registrars after the recent Census. These numbers may be accepted as accurate enough for all practical purposes, and will be employed until the revised details of the Census are available.

During the month of August 1901, there were registered in the Towns of Glasgow, Edinburgh, Dundee, Aberdeen, Paisley, Leith, Greenock, and Perth, the Births of 3992 children, of whom 2050 were males, and 1942 females. Of these, 3702 were legitimate, and 290 illegitimate. The illegitimate Births thus constituted 7·3 per cent. of the whole, or one birth in every 13·8 was illegitimate. In Paisley, 1·7 per cent. of the Births were illegitimate; in Leith, 4·7; in Perth, 4·9; in Aberdeen, 7·0; in Glasgow, 7·5; in Edinburgh, 7·9; in Greenock, 8·7; and in Dundee, 8·9 per cent.

942 Marriages were registered in these Towns during the month, being 60 above the average for August during the ten preceding years, after allowing for the increase of the population.

The Deaths of 2594 persons were registered in these eight Towns during August, of whom 1345 were males, and 1249 females. Increase of the population being allowed for, this number is 95 above the average for the same month during the last ten years.

A comparison of the Deaths registered shows that during August the mortality was at the annual rate of 14·7 Deaths per thousand persons in Aberdeen; 16·5 in Leith; 16·6 in Perth; 17·7 in Edinburgh; 18·0 in Paisley; 19·0 in Greenock; 19·5 in Glasgow; and 19·6 in Dundee.

Of the 1267 Deaths registered in Glasgow, 419 were of children under one year of age, and 196 of persons over 60; of the 479 in Edinburgh, 126 were of children under one year, and 116 of persons over 60; of the 269 in Dundee, 88 were of children under one, and 62 of persons over 60; of the 192 in Aberdeen, 53 were under one, and 51 over 60; of the 122 in Paisley, 34 were under one, and 20 over 60; of the 109 in Leith, 45 were under one, and 16 over 60; of the 110 in Greenock, 28 were under one, and 22 over 60; and of the 46 in Perth, 13 were under one, and 13 over 60 years.

Of the whole 2594 Deaths, 1152, or 44·4 per cent., were of children under five years of age. In Perth, 32·6 per cent. of the persons who died were under five years of age; in Aberdeen, 36·5; in Greenock, 38·2; in Edinburgh, 39·0; in Dundee, 44·2; in Paisley, 44·3; in Glasgow, 48·1; and in Leith, 51·4 per cent.

Miasmatic Diseases caused 175 Deaths, or 6·7 per cent. of the whole. This rate was exceeded in Glasgow from the prevalence of Measles and Hooping-Cough, and in Paisley from Hooping-Cough.

To Measles 57 Deaths were attributed, being 2·0 per cent. of the total. The percentage of Deaths from Measles in Glasgow was 3·6.

From Hooping-Cough there resulted 61 Deaths, or 2·4 per cent. of the total mortality. In Paisley, 4·9 per cent. of the Deaths were due to Hooping-Cough.

Fevers caused 32 Deaths, of which 28 were due to Enteric, 2 to Typhus (1 in Glasgow and 1 in Edinburgh), and 2 to Simple Continued Fever.

Diarrhoea and Dysentery caused 281 Deaths, or 10·8 per cent. of the whole. To these Diseases were attributed 12·7 per cent. of the Deaths in Greenock; 17·5 of those in Dundee; and 27·5 of those in Leith.

Diphtheria caused 9 Deaths; Scarlet Fever 10; Simple Cholera 14; and Puerperal Fever 8.

Sixteen Deaths were due to Intemperance, 11 being ascribed to Chronic Alcoholism, and 5 to Delirium Tremens.

From Apoplexy there resulted 73 Deaths; from Paralysis, 46; from Diseases of the Heart, 211; and from Premature Birth Debility, 63.

The Deaths from Inflammatory Affections of the Respiratory Organs (not including Consumption or Hooping-Cough) amounted to 219, being 8·4 per cent. of the whole. Those from Consumption alone numbered 215, or 8·3 per cent. Three Deaths were caused by Croup.

The Deaths of 105 persons resulted from Violent Causes, of which 5 were Suicidal (three from Hanging, and two from Cut-throat).

Two males and 10 females were aged 90 years and upwards, the oldest of whom was a female aged 99 years.

THE METEOROLOGICAL RETURNS

FOR

EIGHT OF THE PRINCIPAL TOWNS IN SCOTLAND,

Reduced and corrected as heretofore for instrumental errors, give for their mean position, *i.e.*, Lat. $56^{\circ}12' N.$, and Long. $3^{\circ}30' W.$, and height 152 feet above the sea-level.

For the month of AUGUST 1901.

Mean barometric pressure, 29.935 inches; greater than the average for the same month of 1856–1900 by 0.075 inch.

Barometric monthly range, 1.085 inch; greater by 0.108 inch.

Mean temperature, $59^{\circ}1$; greater by $1^{\circ}5$.

Mean daily range of temperature, $14^{\circ}7$; greater by $0^{\circ}6$.

Mean humidity, 79; less by 3.5.

Rain, number of days, 16; being the average.

Rain, depth in inches, 3.81; greater by 0.35 inch.

Wind, pressure on square foot, 1.78 lb.; greater by 0.46 lb.

Wind, direction of, E. to W. as 4 to 15, and N. to S. as 3 to 9; the average being E. to W. as 6 to 12, and N. to S. as 4 to 6.

Hence the weather of August 1901 was characterised by a mean barometric pressure and a monthly range a good deal above the average; a high mean temperature, with a mean daily range a little above the average; a low mean humidity; a mean rainfall, a little above the average, falling on the average number of days; a four days' excess of southwesterly winds, blowing with a force rather above the average.

The mean barometric pressure was 29.935 inches, being 0.075 inch in excess of the average. Pressure was more above the average in the south and west than in the north and east, resulting in a four days' excess of southwest winds a little stronger than usual.

The mean temperature was $59^{\circ}1$, or $1^{\circ}5$ above the average, the days being $1^{\circ}9$ and the nights $1^{\circ}0$ warmer. The temperature of the towns in the east was $2^{\circ}0$, but of the towns in the west only $1^{\circ}3$ above the average; this result being brought about by the greater prevalence of southwesterly winds taken in connection with the anticyclonic type of weather which frequently prevailed. The absolutely highest temperature was $79^{\circ}7$ on the 1st at Leith; and the lowest $42^{\circ}0$ on the 17th and 21st at Aberdeen.

The mean rainfall was 3.81 inches, or 10 per cent. above the average. The least amount collected was 2.74 inches, or 12 per cent. under the average, at Aberdeen; and the largest 5.94 inches, or 12 per cent. above the average, at Greenock. Very little rain fell from the 18th to the 25th, and on the 1st, 2nd, and 31st. Very heavy rains accompanied the thunderstorms of the 10th and 12th, there falling at Leith 1.75 inch, at Edinburgh 1.59 inch, 1.16 inch at Dundee, and 1.03 inch at Aberdeen on the 10th. On the 17th there fell 1.64 inch at Greenock, and 1.20 inch at Paisley. Owing to the restricted areas where these heavy rains accompanying the thunderstorms occurred, the distribution of the rainfall of the month over Scotland was extremely irregular.

ABSTRACT OF METEOROLOGICAL OBSERVATIONS

Made at GLASGOW, EDINBURGH, DUNDEE, ABERDEEN, LEITH, PAISLEY, GREENOCK, and PERTH,

During the Month of AUGUST 1901.

MONTHLY RETURN
OF THE
BIRTHS, DEATHS, AND MARRIAGES
REGISTERED
IN EIGHT OF THE PRINCIPAL TOWNS OF
SCOTLAND;
WITH THE CAUSES OF DEATH AT FOUR PERIODS OF LIFE.

SEPTEMBER 1901

Published by Authority of the Registrar-General.

EDINBURGH: Printed for His Majesty's Stationery Office by NEILL & Co. Ltd., Bellevue, and sold
by OLIVER & BOYD, Edinburgh.

REPORT.

DURING the month of September 1901, there were registered in the Towns of Glasgow, Edinburgh, Dundee, Aberdeen, Paisley, Leith, Greenock, and Perth, the Births of 3989 children, of whom 2031 were males, and 1958 females. Of these, 3722 were legitimate, and 267 illegitimate. The illegitimate Births thus constituted 6·7 per cent. of the whole, or one birth in every 14·9 was illegitimate. In Greenock, 3·0 per cent. of the Births were illegitimate; in Leith, 4·5; in Paisley, 4·9; in Edinburgh, 5·3; in Perth, 6·5; in Dundee, 6·9; in Glasgow, 7·4; and in Aberdeen, 8·9 per cent.

During the same month 1174 Marriages were registered in these Towns, being 179 above the average for September during the last ten years, after allowance has been made for the increase of population.

The Deaths of 2299 persons were recorded in these eight Towns during September, of whom 1189 were males, and 1110 females. Allowing for increase of population, this number is 92 below the average for the same month during the past decennium.

The mortality for the month was at the annual rate of 13·7 per thousand persons in Perth; 15·1 in Paisley; 15·8 in Edinburgh; 16·9 in Glasgow; 17·3 in Aberdeen; 17·6 in Dundee; 19·1 in Leith; and 20·0 in Greenock.

Of the 1063 Deaths registered in Glasgow, 260 were of children under one year of age, and 190 of persons over 60 years; of the 413 in Edinburgh, 95 were of children under one year, and 91 of persons over 60; of the 233 in Dundee, 56 were of children under one, and 55 of persons over 60; of the 220 in Aberdeen, 70 were under one, and 63 over 60; of the 99 in Paisley, 22 were under one, and 23 over 60; of the 122 in Leith, 34 were under one, and 32 over 60; of the 112 in Greenock, 22 were under one, and 32 over 60; and of the 37 in Perth, 3 were under one year, and 12 over 60 years.

Of the whole 2299 Deaths, 841, or 36·6 per cent., were of children under five years of age. In Perth, 13·5 per cent. of the persons who died were under five years of age; in Edinburgh, 32·0; in Greenock, 32·1; in Paisley, 36·4; in Glasgow and in Dundee, 38·9; in Aberdeen, 39·1; and in Leith, 39·3 per cent.

Miasmatic Diseases caused 143 Deaths, or 6·2 per cent. of the whole. In Paisley, 11·1 per cent. of the Deaths were due to Miasmatic Diseases, the greater number of these being attributed to Enteric Fever.

Fevers caused 31 Deaths, 1 (in Dundee) being due to Typhus, 1 to Simple Continued, and 29 to Enteric Fever.

From Hooping-Cough there resulted 44 Deaths; from Measles, 36; from Scarlet Fever, 15; from Diphtheria, 11; from Simple Cholera, 3; and from Puerperal Fever, 14.

Diarrhœa and Dysentery caused 154 Deaths, or 6·7 per cent. of the total number. To these Diseases were ascribed 8·9 per cent. of the Deaths in Greenock; 9·0 per cent. of those in Leith; and 10·7 per cent. of those in Dundee.

Eleven Deaths were the result of Intemperance, of which 8 were due to Chronic Alcoholism, and 3 to Delirium Tremens.

Apoplexy caused 88 Deaths; Paralysis, 41; Diseases of the Heart, 222; and Premature Birth Debility, 52.

The Deaths from Inflammatory Affections of the Respiratory Organs (not including Consumption or Hooping-Cough) amounted to 329, being 14·3 per cent. of the whole mortality. Those from Consumption alone numbered 202, or 8·8 per cent. Three Deaths resulted from Croup.

The Deaths of 94 persons were due to Violent Causes, of which 7 were Suicidal (4 by Hanging, 2 by Cutting or Stabbing, and 1 by Poisoning).

Two males and 10 females were aged 90 years and upwards, the oldest of whom were two widows, aged 95 years.

* Chicken-pox.

THE METEOROLOGICAL RETURNS

FOR

EIGHT OF THE PRINCIPAL TOWNS IN SCOTLAND,

Reduced and corrected as heretofore for instrumental errors, give for their mean position, *i.e.*, Lat. $56^{\circ}12' N.$, and Long. $3^{\circ}30' W.$, and height 152 feet above the sea-level.

For the month of SEPTEMBER 1901.

Mean barometric pressure, 29·871 inches ; greater than the average for the same month of 1856–1900 by 0·004 inch.

Barometric monthly range, 1·111 inch ; less by 0·085 inch.

Mean temperature, $56^{\circ}0$; greater by $2^{\circ}2$.

Mean daily range of temperature, $12^{\circ}5$; less by $0^{\circ}8$.

Mean humidity, 82 ; less by 1·4.

Rain, number of days, 15 ; less by 2 days.

Rain, depth in inches, 2·32 ; less by 1·30 inch.

Wind, pressure on square foot, 1·96 lb. ; greater by 0·52 lb.

Wind, direction of, E. to W. as 12 to 5, and N. to S. as 3 to 11 ; the average being E. to W. as 5 to 12, and N. to S. as 4 to 6.

Hence the weather of September 1901 was characterised by a mean barometric pressure nearly the average, with a monthly range rather less than the average ; a mean temperature very much above the average, having been exceeded only in five years since 1856 ; a mean daily range of temperature nearly a degree less than the average ; a low mean humidity ; a mean rainfall, one-third less than the average, falling two days fewer than the average ; and an unprecedentedly large excess of easterly and southerly winds, blowing with a force considerably above the average.

The mean barometric pressure was 29·871 inches, being 0·004 inch above the average. The excess at Aberdeen was 0·030 inch, and at Dundee 0·021 inch ; but, on the other hand, at Edinburgh, Glasgow, and Greenock there was a deficiency of 0·010. This different distribution of pressure from the normal pressure occasioned the extraordinary prevalence of easterly and southerly winds and low humidities of the month. The high mean force of the wind was due to the wide-spread storms of the 7th, 8th, 17th to 20th, 26th and 27th.

The mean temperature was $56^{\circ}0$, or $2^{\circ}2$ above the average, the excess being nearly equally distributed between the days and the nights. As usual when easterly winds are prevalent the excess was greater in the west than in the east. Thus at Aberdeen and Dundee it was $1^{\circ}5$, whilst at Paisley and Greenock it was $2^{\circ}6$. The absolutely highest temperature was $70^{\circ}8$ on the 12th at Glasgow ; and the lowest $38^{\circ}5$ on the 2nd also at Glasgow. The number of hours of sunshine was unusually large.

The mean rainfall was 2·32 inches, or 36 per cent. under the average. At all the large towns the rainfall was under the average, the greatest deficiency, 70 per cent., being at Edinburgh, and the least, 8 per cent., at Paisley. The greatest absolute amount was 5·11 inches at Greenock, and the least 0·92 inch at Edinburgh. By far the largest portion of the rain fell during the storms referred to above. The only thunderstorm reported was on the morning of the 26th at Dundee, when in a short time 0·34 inch fell, and much flooding was the consequence.

ABSTRACT OF METEOROLOGICAL OBSERVATIONS

MONTHLY RETURN
OF THE
BIRTHS, DEATHS, AND MARRIAGES
REGISTERED
IN EIGHT OF THE PRINCIPAL TOWNS OF
SCOTLAND;
WITH THE CAUSES OF DEATH AT FOUR PERIODS OF LIFE.

OCTOBER 1901.

Published by Authority of the Registrar-General.

EDINBURGH: Printed for His Majesty's Stationery Office by NEILL & CO. Ltd., Bellevue, and sold
by OLIVER & BOYD, Edinburgh.

REPORT.

DURING the month of October 1901, there were registered in the Towns of Glasgow, Edinburgh, Dundee, Aberdeen, Paisley, Leith, Greenock, and Perth, the Births of 4181 children, of whom 2122 were males, and 2059 females. The illegitimate Births numbered 266, and thus constituted 6·4 per cent. of the whole, or one birth in every 15·7 was illegitimate. In Paisley, 4·1 per cent. of the Births were illegitimate; in Greenock, 4·2; in Leith, 4·3; in Perth, 5·3; in Glasgow, 6·1; in Edinburgh, 7·2; in Aberdeen, 7·7; and in Dundee, 8·1 per cent.

The Marriages recorded in these eight Towns during the month amounted to 948, which number is 55 below the average for October during the last ten years, allowing for increase of population.

The Deaths of 2456 persons were registered during the same month, of whom 1246 were males, and 1210 females. After allowance is made for the increase of population, this number is found to be 144 below the average for October during the ten previous years.

The mortality for the month was at the annual rate of 13·6 Deaths per thousand persons in Paisley; 14·7 in Leith; 16·1 in Perth; 16·3 in Edinburgh; 17·2 in Aberdeen; 18·3 in Glasgow and in Dundee; and 19·8 in Greenock.

Of the 1191 Deaths registered in Glasgow, 282 were of infants under one year of

age, and 197 of persons over 60 years; of the 439 in Edinburgh, 84 were of infants under one year, and 121 of persons over 60 years; of the 251 in Dundee, 85 were of infants under one, and 57 of persons over 60; of the 226 in Aberdeen, 79 were under one, and 63 over 60; of the 92 in Paisley, 17 were under one, and 30 over 60; of the 97 in Leith, 28 were under one, and 23 over 60; of the 115 in Greenock, 22 were under one, and 26 over 60; and of the 45 in Perth, 10 were under one year, and 17 over 60 years.

Of the whole 2456 Deaths, 947, or 38·6 per cent., were of children under five years of age. In Perth, 26·7 per cent. of the persons who died were under five years of age; in Paisley, 28·3; in Edinburgh, 29·6; in Greenock, 34·8; in Leith, 39·2; in Aberdeen, 40·7; in Glasgow, 41·3; and in Dundee, 46·6 per cent.

Miasmatic Diseases caused 206 Deaths, or 8·4 per cent. of the total. To Diseases of this class were attributed 10·6 per cent. of the Deaths in Glasgow, Measles being the predominating cause; and 9·8 per cent. of those in Paisley, where the greater number were due to Enteric Fever.

One Death in Glasgow was attributed to Plague.

Fevers caused 40 Deaths, 1 (in Edinburgh) being due to Typhus, 38 to Enteric, and 1 to Simple Continued Fever. Enteric Fever caused 6·5 per cent. of the Deaths in Paisley.

From Measles there resulted 56 Deaths, or 2·3 per cent. of the whole, and of these 50 occurred in Glasgow, being 4·2 per cent. of the Deaths there.

Scarlet Fever caused 25 Deaths in all, and constituted 5·2 per cent. of those in Greenock.

Hooping-Cough and Diphtheria each caused 36 Deaths; Simple Cholera, 2; and Puerperal Fever, 12.

Diarrhoea and Dysentery caused 64 Deaths, or 2·6 per cent. of the whole. To these Diseases were due 7·2 per cent. of the Deaths in Leith.

From Intemperance there resulted 13 Deaths, 12 being due to Chronic Alcoholism and 1 to Delirium Tremens.

Apoplexy caused 102 Deaths; Paralysis, 51; Diseases of the Heart, 201; and Premature Birth Debility, 63.

The Deaths from Inflammatory Affections of the Respiratory Organs (Phthisis and Hooping-Cough excluded) amounted to 457, or 18·6 per cent. of the whole mortality. Those from Phthisis alone numbered 206, forming 8·4 per cent. One Death was attributed to Croup.

The Deaths of 99 persons resulted from Violent Causes, of which 9 were Suicidal (4 by Hanging, 2 by Cut-throat, and 1 each by Shooting, Drowning, and Poisoning).

Four males and two females were aged 90 years and upwards, the eldest being a male and a female both aged 96 years.

THE METEOROLOGICAL RETURNS

FOR

EIGHT OF THE PRINCIPAL TOWNS IN SCOTLAND,

Reduced and corrected as heretofore for instrumental errors, give for their mean position, *i.e.*, Lat. $56^{\circ}12' N.$, and Long. $3^{\circ}30' W.$, and height 152 feet above the sea-level.

For the month of OCTOBER 1901.

Mean barometric pressure, 29.823 inches; greater than the average for the same month of 1856-1900 by 0.003 inch.

Barometric monthly range, 1.482 inch; greater by 0.017 inch.

Mean temperature, $47^{\circ}4$; greater by $0^{\circ}3$.

Mean daily range of temperature, $12^{\circ}5$; greater by $0^{\circ}9$.

Mean humidity, 85; being the average.

Rain, number of days, 20; greater by 3 days.

Rain, depth in inches, 3.10; less by 0.52 inch.

Wind, pressure on square foot, 1.64 lb.; being the average.

Wind, direction of, E. to W. as 7 to 11, and N. to S. as 3 to 9; the average being E. to W. as 6 to 11, and N. to S. as 4 to 6.

Hence the weather of October 1901 was characterised by a mean barometric pressure and a monthly range both very near the average; a mean temperature slightly above the average, with a mean daily range a good deal above it; an average mean humidity; a mean rainfall, half an inch under the average, falling three days more than the average; a three days' excess of southerly winds, blowing with the average force of the month.

The mean barometric pressure was 29.823 inches, or only 0.003 inch more than the average. The excess was equally distributed among the towns.

The mean temperature was $47^{\circ}4$, or $0^{\circ}3$ above the average, the days being $0^{\circ}8$ above, but the nights $0^{\circ}1$ under, the average. At Aberdeen, Dundee, and Perth, mean temperature was nearly a degree under the average; whereas at Edinburgh, Leith, and Glasgow it was fully a degree above it. The highest temperature occurred on the first five days, and the lowest from the 21st to the 27th. The absolutely highest temperature was $66^{\circ}8$ on the 2nd at Paisley, and the lowest $26^{\circ}5$ on the 24th at Perth. At five of the eight towns temperature did not fall to freezing.

The mean rainfall was 3.10 inches, or 14 per cent. under the average. At all the stations the rainfall was under the average, except at Glasgow, where it was 22 per cent. above it. The greatest deficiency was 44 per cent. at Edinburgh and Greenock, but at Aberdeen it was nearly the average. While the number of days' rain was much above the average, yet the largest day's fall at any of the towns was only 0.70 inch on the 27th at Greenock. It is noteworthy that on one day only, the 31st, was no rain recorded at any of the towns. Hail fell at Leith on the 6th, and thunder was heard at Dundee on the 2nd.

MONTHLY RETURN
OF THE
BIRTHS, DEATHS, AND MARRIAGES
REGISTERED
IN EIGHT OF THE PRINCIPAL TOWNS OF
SCOTLAND;
WITH THE CAUSES OF DEATH AT FOUR PERIODS OF LIFE.

NOVEMBER 1901.

Published by Authority of the Registrar-General.

EDINBURGH: Printed for His Majesty's Stationery Office by NEILL & Co. Ltd., Bellevue, and sold
by OLIVER & BOYD, Edinburgh.

REPORT.

DURING the month of November 1901, there were registered in the Towns of Glasgow, Edinburgh, Dundee, Aberdeen, Paisley, Leith, Greenock, and Perth, the Births of 3652 children, of whom 1874 were males, and 1778 females. The illegitimate Births numbered 230, and thus constituted 6·3 per cent. of the whole, or one birth in every 15·9 was illegitimate. In Leith, 2·5 per cent. of the Births were illegitimate; in Greenock, 4·0; in Paisley, 4·3; in Glasgow, 5·7; in Perth, 6·3; in Edinburgh, 7·5; in Aberdeen, 8·1; and in Dundee, 9·6 per cent.

The number of Marriages recorded in these eight Towns during the month was 944, being 82 below the average for November during the last ten years, allowing for increase of population.

The Deaths of 2869 persons were registered during the month, of whom 1462 were males, and 1407 females. This number is 12 above the average for November during the previous ten years, after allowance is made for the increase of population.

A comparison of the deaths registered shows that during November the mortality was at the annual rate of 18·1 deaths per thousand persons in Edinburgh; 19·5 in Paisley; 19·6 in Leith; 20·0 in Greenock; 20·3 in Aberdeen and in Perth; 21·8 in Dundee; and 22·8 in Glasgow.

Of the 1430 Deaths registered in Glasgow, 304 were of infants under one year of

age, and 272 of persons over 60 years; of the 473 in Edinburgh, 90 were of infants under one year, and 132 of persons over 60 years; of the 289 in Dundee, 76 were of infants under one, and 75 of persons over 60; of the 257 in Aberdeen, 78 were under one, and 80 over 60; of the 128 in Paisley, 26 were under one, and 39 over 60; of the 125 in Leith, 36 were under one, and 28 over 60; of the 112 in Greenock, 24 were under one, and 29 over 60; and of the 55 in Perth, 12 were under one year, and 12 over 60 years.

Of the whole 2869 Deaths, 1083, or 37·7 per cent., were of children under five years of age. In Edinburgh, 27·7 per cent. of the deaths were of children under five years; in Paisley, 29·7 per cent.; in Perth, 30·9; in Dundee, 38·1; in Aberdeen, 38·9; in Leith, 40·0; in Glasgow, 41·2; and in Greenock, 42·9 per cent.

Miasmatic Diseases caused 257 Deaths, being 9·0 per cent. of the whole mortality. In Glasgow, 12·8 per cent. of the deaths were due to diseases of this class, Measles being the most prevalent.

Fevers caused 48 Deaths, 1 (in Glasgow) being due to Typhus, 46 to Enteric, and 1 to Simple Continued Fever. Enteric Fever caused 4·7 per cent. of the Deaths in Paisley.

To Measles 102 Deaths were attributed, or 3·6 per cent. of the whole mortality. Of these 86 occurred in Glasgow, and 12 in Dundee, forming 6·0 and 4·2 per cent. of the Deaths in these towns respectively.

Diarrhoea and Dysentery caused 54 Deaths; Scarlet Fever, 25; Hooping-cough, 32; Diphtheria, 31; and Puerperal Fever, 8.

Fourteen Deaths resulted from Intemperance, 9 being due to Chronic Alcoholism and 5 to Delirium Tremens.

Apoplexy caused 91 Deaths; Paralysis, 50; Diseases of the Heart, 214; and Premature Birth Debility, 59.

The Deaths from Inflammatory Affections of the Respiratory Organs (not including Hooping-Cough or Phthisis) amounted to 749, or 26·1 per cent. of the whole mortality. Those from Phthisis alone numbered 267, or 9·3 per cent. Five Deaths were attributed to Croup.

112 Deaths resulted from Violent Causes, of which 6 were Suicidal (3 by Cut-throat, 2 by Hanging, and 1 the method of which was not stated).

One male and nine females were aged 90 years and upwards, the eldest being two widows both aged 97 years.

THE METEOROLOGICAL RETURNS

FOR

EIGHT OF THE PRINCIPAL TOWNS IN SCOTLAND,

Reduced and corrected as heretofore for instrumental errors, give for their mean position, *i.e.*, Lat. $56^{\circ}12'$ N., and Long. $3^{\circ}30'$ W., and height 152 feet above the sea-level.

For the month of NOVEMBER 1901.

Mean barometric pressure, 30·087 inches; greater than the average for the same month of 1856–1900 by 0·251 inch.

Barometric monthly range, 1·265 inch; less by 0·291 inch.

Mean temperature, $42^{\circ}1$; greater by $0^{\circ}5$.

Mean daily range of temperature, $10^{\circ}2$; greater by $0^{\circ}2$.

Mean humidity, 86; being the average.

Rain, number of days, 12; less by 4 days.

Rain, depth in inches, 3·09; less by 0·34 inch.

Wind, pressure on square foot, 1·91 lbs.; greater by 0·22 lb.

Wind, direction of, E. to W. as 4 to 15, and N. to S. as 5 to 4; the average being E. to W. as 6 to 11, and N. to S. as 5 to 6.

Hence the weather of November 1901 was characterised by a very high mean barometric pressure with a monthly range considerably under the average; a mean temperature slightly above the average, with a mean daily range a little above the average; an average mean humidity; a rainfall a little less than the average, falling on four days less than the average number; a mean wind force appreciably above the average with four days' excess of westerly winds.

The mean barometric pressure was 30·087 inches, or 0·251 inch above the average. Pressure was higher in the west than in the east, resulting in a predominance of winds from W.

The mean temperature was $42^{\circ}1$, or $0^{\circ}5$ above the average, the days being $0^{\circ}7$ above, and the nights $0^{\circ}3$ above the average. At Dundee and Aberdeen, however, the mean temperature was slightly below the average. At five of the towns the lowest temperatures recorded occurred on the 16th, but at Dundee and Aberdeen on the 24th. The absolutely highest temperature was $57^{\circ}9$ at Glasgow on the 11th.

The mean rainfall was 3·09 inches, or 10 per cent. below the average. At Edinburgh and Leith, however, the rainfall was above the average, at Leith by 7 per cent., and at Edinburgh by 44 per cent. The excess at Edinburgh is accounted for by a heavy fall on the night of the 11th, when 1·41 inch was registered as against only 0·03 inch at Leith, where however, on the following day the fall was 0·62 inch. At Greenock in the three days, 18th, 19th, 20th, taken together 3·89 inches fell.

None of the three western towns report snow; but Aberdeen records snow on three days, and Leith, Dundee and Edinburgh on two days each. At Leith there was hail on 12th and 13th.

The outstanding feature of the weather of the month was the disastrous north-easterly gale on the 12th. Great damage to shipping and loss of life resulted on the eastern coast. Among other heavy losses that of H.M.S. "Active" at Granton will not soon be forgotten.

ABSTRACT OF METEOROLOGICAL OBSERVATIONS

Made at GLASGOW, EDINBURGH, DUNDEE, ABERDEEN, LEITH, PAISLEY, GREENOCK, and PERTH,

During the Month of NOVEMBER 1901.

MONTHLY RETURN
OF THE
BIRTHS, DEATHS, AND MARRIAGES
REGISTERED
IN EIGHT OF THE PRINCIPAL TOWNS OF
SCOTLAND;
WITH THE CAUSES OF DEATH AT FOUR PERIODS OF LIFE.

DECEMBER 1901.

Published by Authority of the Registrar-General.

EDINBURGH: Printed for His Majesty's Stationery Office by NEILL & CO. Ltd., Bellevue, and sold
by OLIVER & BOYD, Edinburgh.

REPORT.

DURING the month of December 1901, there were registered in the Towns of Glasgow, Edinburgh, Dundee, Aberdeen, Paisley, Leith, Greenock, and Perth, the Births of 3801 children, of whom 1981 were males, and 1820 females. Of these, 3548 were legitimate and 253 illegitimate. The illegitimate births thus constituted 6·7 per cent. of the whole, or one birth in every 15·0 was of this nature. In Perth, 1·6 per cent. of the births were illegitimate; in Greenock, 1·9; in Leith, 3·7; in Paisley, 4·9; in Glasgow, 6·6; in Edinburgh, 7·0; in Aberdeen, 8·6; and in Dundee, 9·6 per cent.

The number of Marriages recorded in these eight Towns during December was 1727. This number is 179 above the average for the month during the last ten years, after the necessary correction has been made for the increase of population.

The Deaths of 3074 persons were registered in these towns during the month, of whom 1578 were males, and 1496 females. Allowing for increase of population, this number is 44 above the average for December during the past decade.

A comparison of the Deaths registered shows that during December the mortality was at the annual rate of 16·7 deaths per thousand persons in Leith; 17·6 in Paisley; 19·5 in Greenock; 20·0 in Perth; 21·1 in Edinburgh; 21·7 in Aberdeen; 23·1 in Glasgow; and 23·4 in Dundee.

Of the 1500 Deaths registered in Glasgow, 317 were of infants under one year of age, and 298 of persons over 60 years; of the 569 in Edinburgh, 113 were of infants under one year, and 183 of persons over 60 years; of the 321 in Dundee, 75 were under one year, and 90 over 60 years; of the 286 in Aberdeen, 67 were under one, and 106 over 60; of the 119 in Paisley, 24 were under one, and 27 over 60; of the 110 in Leith, 26 were under one, and 36 over 60; of the 113 in Greenock, 25 were under one, and 23 over 60; and of the 56 in Perth, 8 were under one year, and 15 over 60 years.

Of the whole 3074 Deaths, 1084, or 35·3 per cent., were of children under five years of age. The percentage of deaths of children of this age was 25·0 in Perth; 28·3 in Edinburgh; 29·1 in Leith; 29·7 in Aberdeen; 33·6 in Paisley; 38·6 in Dundee; 38·7 in Glasgow; and 42·5 in Greenock.

Miasmatic Diseases caused 286 Deaths, or 9·3 per cent. of the total mortality. This proportion was slightly exceeded in Glasgow and in Dundee from the prevalence of Measles; in Greenock from Measles and Scarlet Fever; and in Paisley from Enteric Fever.

Fevers caused 37 Deaths, 36 being due to Enteric, and 1 to Cerebro-Spinal Fever. Enteric Fever accounted for 6·7 per cent. of the deaths in Paisley.

From Measles there resulted 136 Deaths, or 4·4 per cent. of the whole. Of these, 98 occurred in Glasgow, or 6·5 per cent. of the deaths there; 27 in Dundee, or 8·4 per cent.; and 7 in Greenock, or 6·2 per cent.

Scarlet Fever caused 24 Deaths in all, and constituted 5·3 per cent. of those in Greenock.

Diarrhœa and Dysentery caused 47 Deaths; Hooping-cough, 39; Diphtheria, 21; and Puerperal Fever, 5.

Nineteen Deaths were due to Intemperance, 14 being ascribed to Chronic Alcoholism, and 5 to Delirium Tremens.

Apoplexy caused 110 Deaths; Paralysis, 50; Diseases of the Heart, 271; and Premature Birth Debility, 79.

The Deaths from Inflammatory Affections of the Respiratory Organs (not including Hooping-Cough or Phthisis) amounted to 776, or 25·2 per cent. of the whole. From Phthisis 237 Deaths were registered, or 7·7 per cent. Three Deaths were attributed to Croup.

The Deaths of 143 persons resulted from Violent Causes, of which 5 were Suicidal (2 by Cut-throat, and one each by Shooting, Hanging, and Precipitation).

Six males and 8 females were aged 90 years and upwards, the eldest being a widow aged 96 years.

* Chicken-pox.

THE METEOROLOGICAL RETURNS

FOR

EIGHT OF THE PRINCIPAL TOWNS IN SCOTLAND,

Reduced and corrected as heretofore for instrumental errors, give for their mean position, *i.e.*, Lat. $56^{\circ}12'$ N., and Long. $3^{\circ}30'$ W., and height 152 feet above the sea-level.

For the month of DECEMBER 1901.

Mean barometric pressure, 29.488 inches; less than the average for the same month of 1856-1900 by 0.313 inch.

Barometric monthly range, 1.675 inch; greater by 0.067 inch.

Mean temperature, $37^{\circ}3$; less by $1^{\circ}4$.

Mean daily range of temperature, $8^{\circ}2$; less by $0^{\circ}9$.

Mean humidity, 87; being the average.

Rain, number of days, 19; greater by 2 days.

Rain, depth in inches, 3.84; being the average.

Wind, pressure on square foot, 2.36 lbs.; greater by 0.55 lb.

Wind, direction of. E. to W. as 5 to 14, and N. to S. as 6 to 7; the average being E. to W. as 4 to 13, and N. to S. as 4 to 7.

Hence the weather of December 1901 was characterised by an unusually low mean barometric pressure, with a monthly range a little above the average; a rather low mean temperature, with a mean daily range a degree less than the average; an average mean humidity; a mean rainfall also the average, but falling on two days more than the average; with average winds as regards direction, but blowing with a force considerably above the average.

The mean barometric pressure was 29.488 inches, or 0.313 inch less than the average. This is the lowest mean pressure of December since 1876, when it was 29.405 inches, the lowest which has occurred since 1856 being 29.343 inches in 1868. The depression was rather greater in the north than in the south, thus forming steeper barometric gradients, and consequently resulting in stronger winds.

The mean temperature was $37^{\circ}3$, or $1^{\circ}4$ less than the average, the days being $1^{\circ}8$ and the nights $1^{\circ}0$ cooler than usual. The diminution of temperature was nearly equally distributed among the large towns. Temperature was lowest from the 9th to the 20th. The absolutely highest temperature was $58^{\circ}0$ on the 1st at Perth, at which the absolutely lowest temperature, $18^{\circ}0$, also occurred on the 16th.

The mean rainfall was 3.84 inches, which is the average of the month. The amounts differed little from their averages at Dundee, Perth, Paisley, and Greenock; but the average was exceeded by 25 per cent. at Leith and Edinburgh, and 15 per cent. at Aberdeen. Snow was of repeated occurrence from the 8th to the 20th, and in the south also on the 23rd and 28th. The only occasion on which the rain exceeded an inch was at Greenock, where, on the 6th, 1.35 inch fell. The weather during the month was unusually wet, cold, and stormy.

ABSTRACT OF METEOROLOGICAL OBSERVATIONS

Made at GLASGOW, EDINBURGH, DUNDEE, ABERDEEN, LEITH, PAISLEY, GREENOCK, and PERTH,

During the Month of DECEMBER 1901.

SUPPLEMENT

TO THE

MONTHLY RETURNS

OF THE

REGISTRAR-GENERAL OF SCOTLAND,

1901.

The Population of Scotland, of each Civil County, and of Burghs of 20,000 inhabitants and over, on 31st March 1901, obtained from the Summaries prepared by the Registrars throughout Scotland, and as received in the Office of the Registrar-General.

COUNTIES OF SCOTLAND AS AT CENSUS 1901.

COUNTIES.	PERSONS.
ABERDEEN	303,889
ARGYLL	73,166
AYR	254,133
BANFF	61,439
BERWICK	30,785
BUTE	18,659
CAITHNESS	33,619
CLACKMANNAN	31,991
DUMBARTON	113,660
DUMFRIES	72,562
EDINBURGH	487,553
ELGIN (or MORAY)	44,757
FIFE	218,350
FORFAR	283,729
HADDINGTON	38,653
INVERNESS	89,901
KINCARDINE	40,891
KINROSS	6,980
KIRKCUDBRIGHT	39,359
LANARK	1,337,848
LINLITHGOW	64,787
NAIRN	9,291
ORKNEY	27,723
PEEBLES	15,066
PERTH	123,255
RENFREW	268,418
ROSS AND CROMARTY	76,149
ROXBURGH	48,793
SELKIRK	23,339
SHETLAND	27,755
STIRLING	141,894
SUTHERLAND	21,389
WIGTOWN	32,591
TOTAL	4,462,374
SHIPPING	9,583
TOTAL POPULATION, SCOTLAND	4,471,957

Note.—The Shipping Population is not included in the Counties, as it is not as yet allocated.

BURGHES HAVING A POPULATION OF 20,000 AND OVER.

BURGHES.						PERSONS.
ABERDEEN	153,108
AIRDRIE	22,288
ARBROATH	22,372

MOTHERWELL	30,423
PAISLEY	79,355
PARTICK	54,274
PERTH	32,872
WISHAW	20,869

The Census returns are still liable to revision, but it is not likely that such revision will materially alter the Totals, and those unrevised Totals will, in the meantime, be substituted for those now used in estimating population, and all the rates given in the Registrar-General's returns will be calculated on this new basis.
